

Application form for a transport authorisation for radioactive materials in Luxembourg

By the present form, the undersigned applies for a transport authorisation for radioactive materials falling under the authorisation regime defined by the radiation protection law of 28 May 2019 and the radiation protection regulation of 1 August 2019. The transport of nuclear fuel and uranium hexafluoride is forbidden (law Art. 35.).

1. Input

Fields marked with an * are mandatory

General information of the applicant

Name and surname of the applicant* :	<input type="text"/>
Status of the applicant* :	<input type="text"/>
Company name* :	<input type="text"/>
Corporate name* :	<input type="text"/>
Administrative headquarters* :	<input type="text"/>

Subject of the application and transport related information

Transport mode and information on transport* : (possibly the destination, the presumed date or the frequency)	<input type="text"/>
Information on the transported radioactive substances* : (characteristics of the transported radioactive materials, quantity, physical and chemical state, sealed or unsealed nature, packaging, nature and intensity of emitted radiation)	<input type="text"/>
Transported UN numbers* :	<input type="text"/>
Precautionary measures related to the handling and storage* :	<input type="text"/>

Radiation protection officer

In-house person responsible for monitoring the transport, as well as for the special conditions which may be imposed by the authorisation.

Name and surname* :

Business address* :

Phone number (business)* :

Email address (business)* :

Documents to attach :

- Certificate attesting the validity of the qualification

Safety advisor Class 7 (if applicable)

Name and surname :

Business address :

Phone number (business) :

Email address (business) :

Documents to attach :

- Certificate attesting the validity of the qualification
- A copy of the signed contract (if external advisor)

Staff assigned to the transport :

Documents to attach :

- The qualification of the staff assigned to transporting and conveying
- The information provided to said staff on the measures to be taken in the event of accidents

Supporting documents to attach

- Internal emergency procedure.
- The radiation protection programme defining the radiation protection objectives as well as the means provided to achieve those objectives considering the nature and extent of risks.
- The certificate of the insurance policy covering the risks involved in incidents and/or accidents likely to be caused by the nature of the transported goods.
- A copy of the authorisation for the transport of radioactive substances issued by the competent authority of the state where the establishment has its registered office (carrier established outside the territory of the Grand-Duchy of Luxembourg)

The application for a transport authorisation by air shall be accompanied by the special or general transport authorisation delivered by the Minister of Transport or his delegate.

Tax

The undersigned hereby acknowledge that by 1 June of every year, carriers with an authorisation for the transport of radioactive materials, excluding authorisations limited to the transport of packages bearing the identification number UN 2908, 2909, 2910 and 2911, are required to pay a tax of EUR 500.

Proof of payment must be sent to the National Health Directorate.
